DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 9-10 and 15-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 9-10 and 15-16 are rendered indefinite by the phrases “double-layer structure” and “pseudo double-layer structure.” It is not clear what the distinction is between a double-layer structure and a *pseudo* double-layer structure. In addition, all of the rejected claims are directed to structures having more than two layers. Thus, it is not clear that the double-layer consists of the perpendicular magnetic recording layer and the soft magnetic layer.

✓ Claims 9-10 lack antecedent basis for the limitation “the perpendicular orientation promoting underlayer.”

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this

Art Unit: 1773

subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-16 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Futamoto et al. (US 6541125).

Futamoto et al. disclose a magnetic recording medium having a first underlayer formed from a CrTi alloy, a second underlayer formed from a CoCrPt alloy, a magnetic recording layer containing at least Co, Cr, and Pt, and a protective/lubricant overcoat. The reference also teaches that a soft magnetic layer can be used in between the substrate and the first underlayer.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Holly Rickman whose telephone number is (703) 305-2642. The examiner can normally be reached on Monday-Friday 9:30-6:00.
